1. Power on Crestron Controller:
   
   a. Touch the screen of the controller on the desktop to wake the system up.
   
   b. Click on the blue bar labeled “Projector System Start Up.”
   
   c. A message will display: “Please Wait While The System Is Warming Up.”

2. Power on overhead projector IF the projector does not automatically start through the Crestron controller.
   
   a. Use the remote control labeled “EPSON” to turn on the projector.
   
   b. Press the red button at top left labeled “On.”
c. The projector will start and a green light will display on the projector as it warms up.

d. Once the projector is warmed up, the light will display solid green.

3. Select the device output on the Crestron.

a. PC: Ensure system is on and “awake.” Select “VGA” as the source.

b. Laptop: Plug in HDMI cable. Select “HDMI” as source.

c. iPad: Use the Apple dongle adapter. Select “iPad” on the screen.
d. DVD player: System plays both standard and BluRay discs. Ensure the DVD player in the cabinet is powered on. Load disc. Select “BluRay” on the controller.

4. Power down the projection system:
   a. When finished, press the “Exit” button on the controller.
   b. Press the “YES” button on the controller when the “Are You Sure You Want To Exit” prompt appears.
Quick Start Guide – Coe 123 Media Viewing Room

---

c. A message “Please Wait While The System Is Cooling Down” will display.

d. If the projector does not automatically turn off, use the remote control labeled “EPSON” to turn it off. Press the red button labeled “Standby.”

5. Ensure both the projector and Crestron controller are turned off.

6. Turn off the DVD player if it was used. Leave rest of the stereo components on.

7. Leave the PC turned on.

8. Disconnect any adapters from laptops or other devices. Ensure that the Apple iPad dongle is left connected to the system.

9. If you have problem with the system during normal business hours (8-5) on weekdays, contact Classroom Technical Support (CTS) at 766-2872 or at userhelp@uwyo.edu.
